# Smartphones

According to Apple:

- 63% of all students enrolled in colleges and universities own smartphones
- College students are the fastest growing sector of the market
- Expected growth for 2011 is almost 50%

## 세계 스마트폰 시장 규모 및 전망

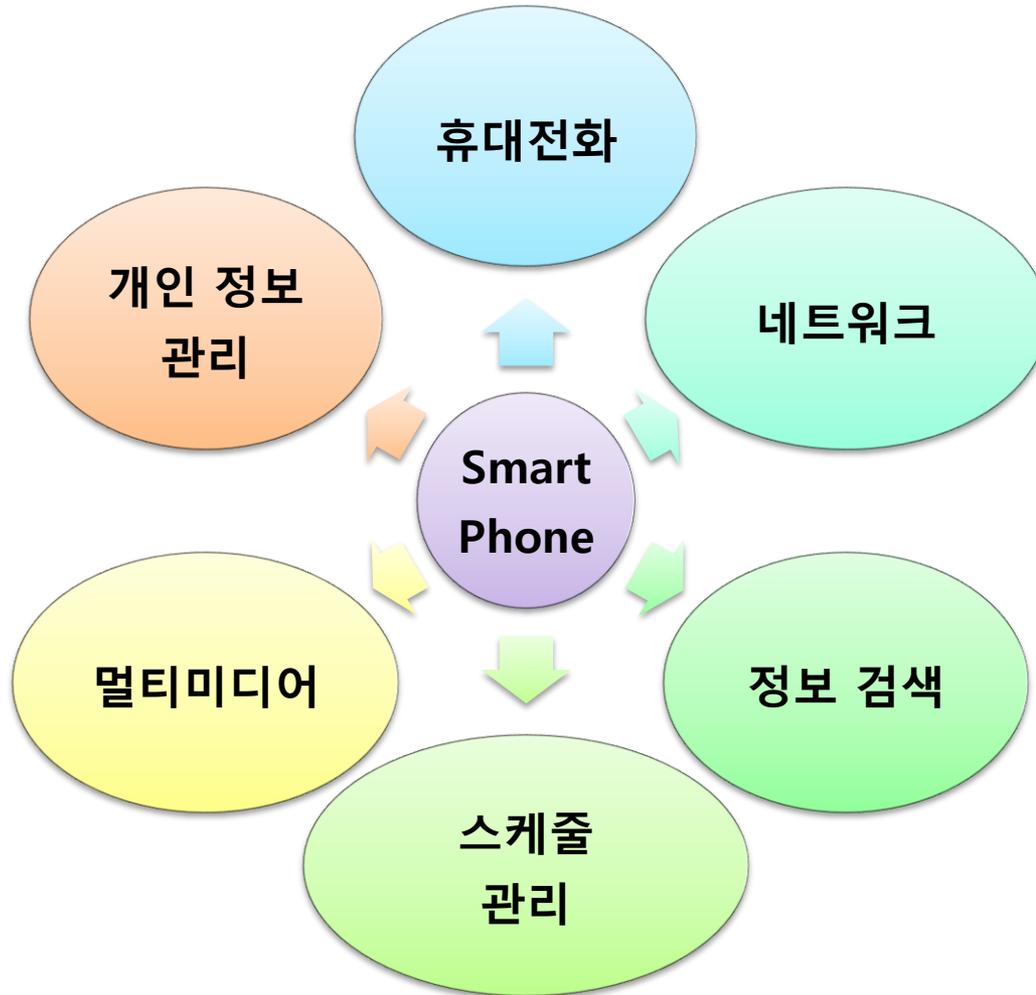

출처 : 가트너

# Smartphone Philosophy

- To integrate the telephone system with the processing power of a computer
- To be able to run various applications that optimize communication everywhere
- The first smartphone designed in 1992 shows a non product.

# 스마트폰 = 휴대폰 + “손안의 PC”

## [직장인] 스마트폰 사용으로 생활이 변화한 부분

# Mobile Devices

Why are mobile devices so popular?

- Combine the functionality of a computer with portability
- Lower cost
- Connect to Internet wirelessly
- Apps

# What are Apps?

- The term ‘app’ stands for a computer application on the mobile device.
- Apps can be e-books, interactive reference materials, training modules, medical software devices, data collection tools, interactive patient handouts, etc.

# 필요는 발명의 어머니

# Mobile Learning in the clinical setting

From:

[BMC Med Educ. 2012; 12: 1.](#)

Published online 2012 January 12.

doi: 10.1186/1472-6920-12-1<sup>3</sup>

# Try weigh it yourself!

## Smartphone pros

- Combines PDA and mobile phone functionality
- Have tri or quad-band GCM modules for worldwide use
- Has a variety of accessories
- Has quality resolution and colour screen
- Plays music and video files making it a portable multimedia device

## Smartphone cons

- Limited text entry capability
- Nationwide coverage for high speed data is limited to areas with larger populations
- Does not have the same built in applications like a pocket PC

# You Learn Best When You Do !

## Abstract

### Abstract

We undertook a two-stage genome-wide association study (GWAS) of Alzheimer's disease (AD) involving over 16,000 individuals, the most powerful AD GWAS to date. In stage 1 (3,941 cases and 7,848 controls), we replicated the established association with the apolipoprotein E (APOE) locus (most significant SNP, rs2075650,  $P = 1.8 \times 10^{-157}$ ) and observed genome-wide significant association with SNPs at two loci not previously associated with the disease: at the CLU

9), odds ratio = 1.86)

# Mobile Learning

- Mobile learning is an emergent paradigm in a state of intense development fuelled by the confluence of three technological streams:
  - ambient computing power
  - ambient communication &
  - development of intelligent user interfaces (Sharples *et al.*, 2002).

# 모바일 수업의 과제들

- 많은 경우에 최종 확인을 위해서는 고성능의 데스크탑 PC 필요
- 간단한 정보 위주의 실시간 검색에 주로 이용
- 비용이 드는 앱에 대한 고민
- 새로운 수업 전략 계속 개발 필요

# 마무리

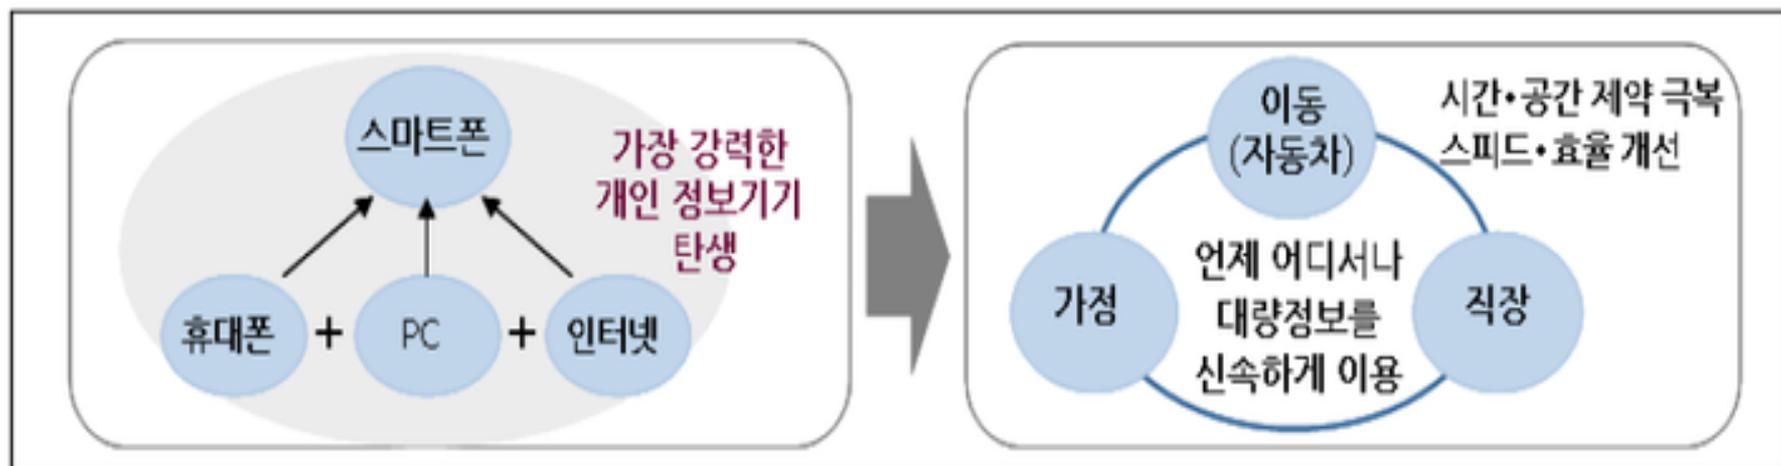

- 성공(숙달) 목표 제시
  - 학생들의 눈높이 맞추기
  - 팀짜기 훈련 (이질적 구성원간)
  - 노력과 향상에 가치를 둔 칭찬
  - 다양성 강조

# Q & A

*There are no stupid questions.*

*- Scott Adams -*

## 스마트폰으로 인한 미래 변화

'3R 시대': 실시간(Real-time)으로 무한한 정보와 인적 네트워크에 접근(Reach)하여 시간·공간적 한계를 넘어선 실제감(Reality)을 경험

① 라이프스타일의 변화	② 신시장/비즈니스모델 출현	③ 기업간 경쟁구도의 변화
